

One solution provider to deliver the most comprehensive and seamlessly integrated set of solutions to **SIMULATE, VIEW, ENGAGE, FEEL** and **BUILD** your Modeling, Simulation & Training domain.

INFINITE POSSIBILITIES, Performance, Versatility, Competitive Advantage

In the world of evolving technologies, success is achieved by a willingness to challenge established boundaries.

COMPRO is constantly developing innovative simulation hardware and software solutions for Real Time applications, including rapid transit, process control, simulation-based lab testing and interactive training systems.

Our mission is to develop products, solutions, and services that provide the speed, power, and reliability required by the most sophisticated and time sensitive applications in the industry. We create those systems with the potential for compatibility and expansion that will meet tomorrow's most ambitious expectations.

We're also committed to providing the most comprehensive services necessary to meet every customer's needs.

COMPRO is known worldwide for its customer-focused leadership in technology, support solutions and innovative "industry firsts."

To date, we achieved an installed base of over **10,000 systems**, representing over **3,000 customers worldwide**. These customers are served via our **worldwide offices with our Corporate Office strategically located in central Florida**.

COMPRO is an international supplier to the flight simulation, data acquisition, and transportation and energy markets and to original equipment manufacturers and integrators (such as Boeing, Lockheed Martin, Thales, EADS, etc.) who serve those markets.

We develop legacy interfaces and integrates COTS hardware and software that are demanded by today's most challenging real time environments. Our products are involved in open systems, integration for data acquisition, legacy migration, and flight simulation solutions.

Tomorrow's Success Belongs to Those with the Vision to Redefine the Possible
